Program Summary
The inaugural Science for All Summit was conceived to engage educators, practitioners, researchers, and other change agents in conversation and knowledge building around emerging issues and innovative strategies related to advancing inclusion, diversity, equity, and access (IDEA) in the fields of science, technology, engineering, and mathematics (STEM).

The target audience for the Summit includes formal and informal educators, non-profit organizations, corporations, universities, colleges and community colleges, and undergraduate and graduate students.

Sponsorship Benefits
+ Position your organization as a critical supporter in promoting innovation and furthering inclusion, diversity, equity, and access in STEM
+ Engage a community that collaborates, innovates, and implements promising practices shown to effect sustainable change to advance IDEA in STEM
+ Network with leading educators, practitioners, researchers, and thought leaders
